

What to Expect

Room Refresh

01 complete your questionnaire

To kick us off, you'll breeze through a fun and simple questionnaire - telling us about your dream home, attaching photos of your room, and selecting the inspiration that most speaks to you.

02 meet with your designer

We'll leverage Zoom Video conferencing so we can meet face-to-face and talk through your needs for the space. This is our time to really get to know each other (think - painless coffee chat).

03 review your room concept

We'll deliver your completed room concept via our online collaboration platform, where you can see a mood board, itemized shopping list, and budget. Unlike other services, we'll incorporate any existing furniture or decor, wall & window coverings, and source items from big box stores versus only our trade partnerships.

04 refine your design

No endless email chains and dozens of design revisions - we know the more back and forth it takes to get your design perfect the more overwhelming designing your home becomes! Within our collaboration platform, you'll approve or deny your recommended products and leave any necessary notes and we'll deliver an adjusted concept. Two revisions and you're good to go with a design you love!

05 refresh your space

Once your design is complete, you'll receive an itemized shopping list with links to check out seamlessly as well as sizing and implementation recommendations.
